5 vehicles on highways and providing a penalty.

Analysis by the Legislative Reference Bureau

Under current law, a “neighborhood electric vehicle” (NEV) is a motor vehicle that is propelled by electric power and that meets certain standards for low-speed vehicles (LSVs) under federal law, but does not include a golf cart. A municipality may, by ordinance, allow the use of NEVs on roadways under its jurisdiction that have a speed limit of 35 miles per hour or less. However, a municipal ordinance may not allow the use of NEVs on connecting highways within the municipality, or where the municipality’s roadways cross state trunk highways, unless all of the following apply: 1) the municipality provides written notice to the Department of Transportation (DOT) of the ordinance, including identification of any connecting highway or state trunk highway intersection to which the ordinance will apply; and 2) within 21 days of receiving this notice, DOT consents or fails to object to the use of NEVs on the connecting highway or through the intersection crossing the state trunk highway.

Also under current law, DOT assesses demerit points against the driving record of persons convicted of certain traffic law violations.

This substitute amendment authorizes the operation of LSVs on certain highways. The substitute amendment eliminates the requirement that an NEV be propelled by electric power and redefines an NEV as an LSV. The substitute amendment provides general authorization for the operation of LSVs on highways under the jurisdiction of a municipality or county that have a speed limit of 35 miles per hour or less. This general authorization is subject to exceptions related to intersections crossing state trunk highways, connecting highways, expressways, freeways, or controlled-access highways and to operation of LSVs on connecting highways. However, a municipality or county may override this general authorization by adopting an ordinance prohibiting the operation of LSVs on highways under its jurisdiction. In addition, a municipality may override the exceptions to this general authorization by adopting an ordinance to allow the use of LSVs on any roadway within the municipality that has a speed limit of 35 miles per hour or less, regardless of whether the municipality has jurisdiction over the roadway.

The substitute amendment prohibits any person from operating an LSV on a highway other than a highway on which operation is authorized under the substitute amendment. The substitute amendment also prohibits any person from operating an LSV at a speed in excess of 25 miles per hour. Any person violating either of these prohibitions may be required to forfeit not more than \$200 and is subject to the assessment by DOT of two demerit points against the person's driving record.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:
